WORK EXPERIENCE

Publicis Sapient | Senior UX Designer

Nov 2023 -Present

- Led UX strategy and execution for a large retail client across the US and EU, delivering end-to-end B2C mobile experiences aligned with business and user goals.
- Led a major mobile app redesign that increased Easy Pay enrollment from 10% to 45% and boosted average deal impressions per session from 1.15 to 13.4.
- Improved soft age verification initiation rates from 72% to 83% through simplified user flows and clearer messaging.
- Defined UX and UI standards, contributing to a scalable design system and reusable components to support product consistency and speed.
- Led usability testing and card-sorting initiatives to inform information architecture decisions and optimize key B2C user journeys.
- Collaborated with product managers, engineering, and stakeholders to deliver features across discovery, loyalty, and global wallet experiences.
- Facilitated design critiques and mentored designers, improving design quality and cross-team alignment.
- Previously led UX design for a leading UK financial organization, successfully delivering a B2B product.
- Leading an internal initiative at Publicis Sapient with a team of three, focused on elevating designers' profile and visibility.

Affinidi | Senior Product Designer

Jan 2022 -Nov 2023

- Worked as the sole designer for a privacy-preserving identity application that resulted in over 1 million downloads.
- Conducted usability testing for the application, resulting in a 55% decrease in drop-off rate.
- Conducted a UX audit of the app and recommended changes to improve the user experience.
- Worked closely with product managers to capture requirements and with engineers to understand technical feasibility.
- Worked on developer portal design, and the MVP resulted in 4% more users acquired than expected.
- Worked on research and ideation phases to produce user centric design.
- Worked closely with stakeholders for requirements and conducted several sessions for multiple iterations.
- Created low fidelity and high fidelity prototypes and design systems using Figma.
